

EXPERIMENT – 4

Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

AIM: To create and provide a simple cloud-based software application for Car Booking Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) model.

PROCEDURE:

1. Open a web browser and go to Zoho Creator website.
2. Create a Zoho account and log in.
3. Click on Create Application and select From Scratch.
4. Choose Blank App and provide the application name as Car Booking Reservation.
5. Create a form named User Details and add fields such as Name, Phone, Email and Saved address.
6. Create another form named Book a Cab and add fields such as Name, Phone, Email, Number of Passengers, Booking date, Travel date, Pickup Address and Destination Address.
7. Add map-based location pinning for coordinates for addresses.
8. Mark the necessary fields as mandatory.
9. Save the completed form and alter the visual themes.
10. Configure user access and sharing settings to allow multiple users to use the application.
11. Save the application and generate the application URL.
12. Access the application through the URL using any web browser.

RESULT:

A cloud-based Car Booking Reservation System application was successfully created and deployed using Zoho Creator. The application is accessible through a web browser without installation, and users can Sign up and book a car, thereby successfully demonstrating the Software as a Service (SaaS) model.
